

Afghanistan Statistical Yearbook

2020

Afghanistan Statistical Yearbook 2020

**Issues No: 42 | Second Version
August 2021**

Executive Summary

It is a matter of great pleasure for National Statistics and Information Authority (NSIA) as the only official statistical body in the country to have been able to publish the statistical yearbook of 2020, according to its publication calendar by timely data collection. This statistical yearbook depicts the socio-economic condition of the country and also provides an easy access to a rich source of statistical information and data which helps the ministries, government organizations, NGOs and the private sector as well as international community to formulate policies, programs and make evidence based decision.

The data and statistical information in the statistical yearbook have been collected from ministries, government organizations and private sector providing data on economic and social sectors like population, agriculture, education, health, national accounts, consumer price index, energy, construction, mines and energy, services, foreign trade, finance, statistics and foreign aids which can be used by the planners and data users for better and evidence based planning.

The Afghanistan's population is estimated to be 32.9 million for 2020-2021 based on the population statistics department of NSIA. The men and women make up 16.8 million and 16.1million of the total population respectively. Based on the estimated population Graphs the urban population is 8.0 million while the rural population is 23.4 million and the remain 1.5 million is Kochi (Nomadic). The age dependent population is 16.4 million while 15.5 million population of the country is under 15 years of age and 0.9 million is above 64 years old. The returning refugees from Pakistan, Iran and other countries were 376 families comprising of 2147 individuals in the year 2020.

The data on educational attainment of civil service employees working in government shows that in total 324620 employees there are 408 PhD 9042 MA/ MSc 88487 BA/BSc and 226683 employees have lower level of education than BA/BSc.

The higher education data indicates that in 2020 total number of students of the government higher education institutions together with that of the private educational institutions were 429790 which shows 1.2 percent increase compared to the data of last year, comprising of 306155 males and 123635 females. The number of government and private universities and higher education institutions reached to 167 in 2020.

There are 128 private and 39 government universities and higher education institutions where only 1 private institutions have increase comparing to 2019. Teachers of government and private universities have reached to 18286 where 2485 are female and 15801 are male. The university teachers have been decreased by 3.3 percent compared to 2019.

The total number of violence against women and girls in 2020 is 4531 events, it shows a increase of 35,4 percent compared to the previous year.

The number of crime in 2020 is 17903 event, it shows a decrease of 1.6 percent compared to the previous year. In this year, the number of traffic accidents is 2619 event, which is 11.9 percent less than the previous year. In 1354 sq. km of land was contaminated by mines, out of which 83 sq. km has been cleared. That is an increase of about 4.4 percent over last year while many provinces have not been cleared of mines due to insecurity and lack of donors.

Data on public health indicates that in 2020 there were 2736 health centers. There were 2745 health centers throughout the country in 2019 which currently shows 0.3 percent decrease.

These health centers include sub-centers, basic and comprehensive health centers. These facilities are not sufficient. In 2019 there are only 4 beds and 3 medical doctors available per 10000 people. Infectious diseases such as Malaria, Tuberculosis and AIDS existed in Afghanistan in 2020 where AIDS has increased.

The number of people living with AIDS in 2020 are 3066 which has increased by 5 percent compared to previous year.

The aforementioned increase is alarming and should be taken in to consideration. Gross Domestic Product (GDP) of the country was Afs 1547.29 Billion with GDP per capita of Afs 47030.06 The growth rate of real GDP was -2.35 percent in 2020. The share of agriculture, industry and services in total GDP were 26.82, 14.03 and 54.69 percent respectively.

Consumer Price Index (CPI) indicates that inflation rate was 5.6 percent, which was 10.0 percent in food items and 1.4 percent in non-food items in 2020. the inflation rate has increased compared to the last year which was 2.3 percent. Based on the consumer price, the highest inflation was in Herat province by 13.2% followed by Nangarhar province by 12.3% in 2020.

Agricultural data in 2020 indicates that wheat production is 5.2 million metric tons which indicates 4% percent increase as compared to the previous year. The reason for increase in wheat production was increase in wheat cultivated area. The agricultural land under cereals cultivation has increased by 7% compared to previous year.

Electricity production and import figures in the country shows that electricity production and import have decreased from 6197.62 million KWh in the year 2019 to 6182.74 KWh in the year 2020.

Data on foreign trade indicates that in 2020 value of registered goods imports are 6537.6 million and that of exports are 776.7 million only. However, the values of imported goods are 6776.8 million and exports are 863.8 million in 2019. This indicates decrease in the imports by 239.1 million or 3.5 percent and exports decreased by 87.1 million or 10.1 percent compared to the previous year. It is worth mentioning that the total imports include 253.5 million of electricity imports.

Exports of services amounted to 699.6 million in 2020, it shows a increase of 7.3 percent compared to 2019. Exports of goods and services totaled US\$ 1476.3 million in 2020, to compare with 2019 it decreased by 2.6 percent.

Import of services amounted to US\$ 1103.5 million in 2020, it decreased by 9.0 percent compared to 2019. Import of goods and services totaled US\$ 7641.1 million in 2020, to compare with 2019, it decreased by 4.4 percent.

The air transportation data in 2020 indicate that the government airlines named Ariana has transported 586 tons of goods. The other side private airlines have transported 860 Tg passengers.

Hereby, all data Users, Planners, Policy formulators, Academicians and Researchers are humbly urged to share their constructive ideas and critics for better improvement of NSIA publications.

.....

Population

Population

The structure and size of the population are principle components of the development planning, which are to be considered while designing development plans and programs.

The total population of Afghanistan in the year 1399 (2020-21) is estimated around 32.9 millions of which 51.0 percent are males and 49.0 percent are females.

Distribution of population between urban and rural areas shows that out of the settled population 23.4 millions are living in rural areas and 8 millions in urban areas. In addition, 1.5 million are living as nomads.

The most striking feature of the Afghan population is its very young age structure. Whereas 47.2 percent (15.5 millions) are under the age of 15 years, 65 and above are around 2.8 percent. The proportion under 15 is among the highest in the world higher than that of the neighboring countries.

This young population contributes to a very high dependency ratio for every 100 persons in the working age group 15-64, there are 100 persons in the less productive ages, under 15 and over 64.

Based on 2003-2005 household listing data, and population census 1979, the growth rate of Afghan population was calculated as 2.14 percent per annum. Population growth due to rural- urban migration is higher in urban areas.

National Accounts

National accounts

Gross Domestic Product (GDP) data provides an overview of the country's economy and examines the composition of economic activities and the interaction between different economic entities.

Gross domestic product

Nominal GDP, which measures the monetary value of all final goods and services produced in the country during the fiscal year at current prices which amounted to 1547.29 billion Afghanis. GDP per capita was 47030.06 Afghanis in 2020.

Real GDP, which measures the monetary value of all final goods and services produced in the country during the fiscal year in constant prices, of Afghanistan was Afs 1288.87 billion Afghanis. The growth of real GDP was -2.35 percent in 2020.

Sectorial performance

Agriculture

The agriculture value-added was 414.99 billion Afghanis in 2020. The share of this sector in GDP is 26.82 percent, and its growth has reached 5.94 percent.

Industry

Based on International Standard Industrial Classification (ISIC), the industry is comprised of mining and quarrying, manufacturing, electricity, gas, water, and construction.

The value-added for this sector was 217.11 billion Afghanis in 2020. Its share in total GDP was 14.03 percent. The industry sector growth rate was -4.63 percent. The main reason for its decrease in the mining and quarrying sector was -9.39% and in the manufacturing industry, including non-food industries, -15.27% in 2020.

Mining and quarrying

Afghanistan is endowed with a wealth of natural resources, including rich deposits of natural gas, petroleum, coal, marble, gold, copper, chromite, talc, barites, sulfur, lead, iron, salt, precious and semi-precious stones, construction stone, and many other rare earth elements. The value-added for this sector was 23.42 billion Afghanis in 2020. Its share in total

GDP was 1.51 percent.

Despite numerous mines in Afghanistan, so far, most of them have not been extracted.

Electricity, water, and gas

The value-added for electricity, water, and gas was 27.29 billion Afghanis. Its share in total GDP was 1.76 percent. The growth rate was -3.56 percent in 2020.

Construction

The value-added for constructions was 47.63 billion Afghanis, which decreased by -4.44 percent in 2020 than in 2019.

Services

The value-added for services was 846.19 billion Afghanis which shows a decrease of -5.92 percent in 2020. The services sector share of total GDP was 54.69 percent in 2020.

The main growth factor was a decrease in restaurants and hotels, education, real estate -24.19, -18.46, and -14.00 percent, respectively.

GDP by expenditure categories

The final consumption expenditures are 1786.45 billion Afghanis, of which government consumption was 327.61 billion Afghanis, and that of household and NPISH were 1420.55 and 38.29 billion Afghanis, respectively. Expenditures on gross fixed investment amount to 183.85 billion Afghanis while exports and imports of goods and services amount to 113.38 and 536.39 billion Afghanis, respectively, in 2020.

Section Eight

.....

Agriculture

Agriculture

Agriculture has an important role in the Afghanistan economy where 12% of its area is arable that includes irrigated, rain-fed, and temporary fallow land. At the same time, 2.7% of its area is covered by forest, 46.4% covered by permanent pasture, and 38.9% covered by villages, mountains and rivers. Plants are cultivated in form of irrigated and rain-fed. Rain-fed Wheat has an important role for cereal production. Wheat is the major crop for the production of cereal. From total consumption of cereal, wheat constitutes 89 percent. Fruits including watermelon and melon, apricot, pomegranate and grape produced for consumption and export, also dried fruit and nuts especially apricot and almond plays a significant role in exports.

Major crops

Grain

Wheat is a major crop. Cultivated every year on irrigated and rain-fed land. Wheat production in 2020 was 5.2 million tons, rice production was 0.44 million tons, barley production was 0.13 Million tons and maize production was 0.27 million tons.

Also, the total land under cereal and grain cultivation was 3.1 million hectares.

Vegetable

Vegetables are mostly grown for market and home consumption. An estimated 5.5 percent of the total irrigated land was planted with vegetables, the total area under potato cultivation was 53.7 thousand hectares while its production was 855.4 thousand tons. And potato yield was 15.9 tons per hectare. Potato and onion are major vegetables they are particularly used as staple food in the country. The area under onion cultivation in 2020 was 16958 hectares.

Fruits

Different varieties of fruit trees like apple, pomegranate, apricot, berry, grape, almond and etc make up about 3.38% of arable land. In 2020 almost 265 thousand hectares were under fruit tree cultivation. Grapes production was 993.4 thousand tons. Almost all households in the rural area have some fruit trees for self-consumption. In addition, gardens are also a major source of income for farmers in many areas of the country and the majority of large to the medium-sized gardens are exclusively for markets.

Industries and Construction

Industries

Manufacturing industries play a significant role in the country's economic growth. They mainly produce products such as food, non-alcoholic beverages, clothing, paper, printed products, plastic products, chemical products, etc.

In the year 2020, the total value of industrial production reached 5612.9 million AFN, including 871.8 million AFN production of government sector and 4741.1 million AFN production of private sector.

Environment and Natural Resources

Environment and Natural Resources

Environment and natural resources statistics are a new topic, and demand for these statistics is increasing. Considering that human conditions are related to the environment, consideration to environmental indicators, such as temperature, precipitation, relative humidity, sunshine, wind speed, air pollution, clean energy use, natural disasters, for sustainable management of the environment and natural resources are of particular importance.

Precipitation

The monthly average precipitation of the country was the lowest 2.70 mm in September and the highest 77.10 mm in March 2020.

Temperature

The monthly average temperature of the country was the lowest 0.76 centigrade in January, and the highest 25.45 centigrade in June 2020.

Sunshine

Sunshine in Afghanistan is affected by its geographical location in the northern hemisphere. Sunshine is long in summer and short in winter. The lowest monthly average was 132.8 hours in March and the highest was 328.5 hours in June 2020.

Wind Speed

The monthly average wind speed of the country was the lowest 1.41 m/s in November and the highest 3.07 m/s in June 2020.

Electricity

Electricity is produced through hydro, diesel, thermal and solar powers station. Electricity production in 2020 compared to 2019 decreased by 19.81 percent.

Section Eleven

.....
Communication & Transport

Communication & Transport

Land Transport

Afghanistan transportation system includes both land and air transportation. The total number of registered vehicles was 1,997,687 in 2020. It contains 1,210,163 passenger cars, 329,956 trucks, 110,796 buses and 346,772 other types of vehicles.

Air Transport

Afghanistan has four international airports and a few local airports, whereas only three of them are asphalted. The number of flights has been increasing substantially after the end of war in late 2020. Arianna Afghan Airline has four functioning airplanes. These airplanes carried 300 thousand passengers and 586 tons of goods via different routes. In private sector, one airline company Kam Air is active, with 10 airplanes, and it carried 860 thousand passengers via different routes.

Communication

Communication has rapidly developed after the end of the war. During last 20 years the number of fixed line telephone subscribers has increased substantially. In 2020 the number of fixed line telephones were 537,853.

Inflation and Consumer Price Index

Inflation and Consumer Price Index

Inflation and Consumer Price Index

The main purpose of compiling the consumer price is measure change in consumer price level of consumer price inflation for the data users. The CPI and its monthly movements is used as key targets for monetary and fiscal policy, as well as adjusting for inflation in business contracts, employees' salaries and retirees' pensions and other social issues.

A Brief Explanation on the CPI Methodology

The National CPI follows international recommendations with regard to the concepts, classifications and formula. It is a weighted aggregate of the CPIs for Kabul, Herat, Kandahar, Jalalabad, Mazar-e-Sharif, Khost, Helmand, Bamyan, Kunduz, Badakhshan, Takhar, Paktya, Parwan, Ghazni, Ghor, Kapisa, Sare Pul, Jowizjan, Baghlan and Faryab. The basket includes 290 important goods and services, typically consumed by urban middle and low-income households. For each item, prices are collected from three shops located in the central markets or main shopping streets of each city. A total of about 20010 price quotations are obtained each month. The Laspeyres formula is used to calculate the CPIs.

National CPI 2020

The inflation rate measured by the overall consumer price index (CPI) for the country was 5.6 percent in 2020, whereas it was 2.3 percent in 2019.

Food Prices Index

The national overall prices for food had increased by 10.0 percent in 2020, whereas it was 3.8 percent increase in 2019.

The main contributory factors to the increase in the national CPI were cereals by 11.3 percent, meat by 10.6 percent, cooking oil 13.5 percent fresh and dry fruits by 10.2 percent, vegetables 14.9 percent and spices by 7.7 percent.

Non-food prices Index

The national non-food prices increased by 1.4 percent in 2020 which increased by 0.9 percent in 2019. The main contributory factors to the increase were clothing by 7.8 percent, household goods by 2.3 percent, health by 6.7 percent and miscellaneous by 11.2 percent.

.....

Foreign & Trade

Foreign Trade

Foreign Trade

Exports, Free on Board (FOB)

The officially recorded exports of goods were around US\$ 776.7 millions in 2020, which do not include smuggling and re-export. The registered exports in 2020 compared to the 2019 decrease by 10.1 percent (from US\$ 863.8 to US\$ 776.7 millions).

It is worth mentioning that in 2020, dry and fresh fruits constitute 47.4 percent of exports. In 2020, exports of carpets compared to 2019 decreased by 31.6 percent.

Also, it is worth mentioning that during 2020, the value of re-export is US\$ 4.8 million from all borders of Afghanistan.

Exports of services

Exports of services amounted to 699.6 millions in 2020; it shows an increase of 7.3 percent compared to 2019.

Exports of goods and services totaled US\$ 1476.3 millions in 2020, to compare with 2019, it decreased by 2.6 percent.

Imports, Including Cost Insurance Freight (CIF)

The officially recorded import of goods in 2020 was US\$ 6537.6 millions excluding smuggled and duty-free goods.

The registered imports in 2020 compared to the 2019 decreased by 3.5 percent (from US\$ 6776.8 to US\$ 6537.6 millions).

Imports of services

Import of services amounted to US\$ 1103.5 million in 2020, it decreased by 9.0 percent compared to 2019.

Import of goods and services totaled US\$ 7641.1 million in 2020, to compare with 2019, it decreased by 4.4 percent.

Duty free imports

The total duty free imports during the 2020 were US\$ 1471.0 million as compared to US\$ 1791.2 million in the 2019, which shows an decrease of 17.9 percent.

Concepts and Terminologies

Concepts and Terminologies Used in the Statistical Yearbook

These notes discuss the data, sources, and methods used to compile the indicators in this publication. The notes are organized by table and within each table, by indicator in order of appearance.

Demographic and Social Statistics

Life Expectancy at Birth

Life expectancy at birth is the number of years a new born baby would live if prevailing patterns of mortality at the time of his/her birth were to stay the same throughout his/her life.

Population

Population refers to a group of people who live in a geographic area such as a continent, a country, a city, a village etc. at a specific period of time.

Population Density

Population density is an important indicator which shows the relation between the size of population and the area the population is living.

Population Growth

Population growth is the change (increase/decrease) in the size of population during a specified time interval which is usually presented as percentage.

Total Fertility Rate

Total fertility rate is the average number of children that would be born alive to women during their reproductive age, and the rate is usually shown per female in reproduction age.

Crude Birth Rate

Crude birth rate is the annual number of alive births divided by the mid-year population of that year, per 1000 persons population.

Crude Death Rate

Crude death rate is the annual number of deaths divided by the mid-year population of that year, per 1000 persons population.

Access to Safe Water

Shows the percentage of the population with reasonable access to adequate amount of safe water (including treated water or untreated but uncontaminated water from sources such as springs, sanitary wells, and protected boreholes). In an urban area, such source may be a public water tank or stand post located not more than 200 meters away. In rural areas access implies that members of the household do not have to spend a disproportionate part of the day fetching water.

Access to Sanitation

Refers to the percentage of the population with at least adequate disposal facilities that can effectively prevent people, animals, and insects contact with excreta.

Child Immunization

Measures the rate of vaccination coverage of children under one year of age for four diseases—measles and DPT (diphtheria, pertussis or whooping cough, and tetanus).

National Accounts

The National Account System provides a framework for presenting a coherent, consistent and integrated set of macroeconomic accounts, balance sheets and tables. The National Account System is founded on the concepts and principles of macro-economic theory and the framework is based on a set of internationally agreed concepts, definitions, classifications and accounting rules. It also provides the framework for recording the interactions between different economic agents and groups of agents like households, business companies, government and non-profit institutions who are involved in economic activities. The estimates of macro-economic aggregates compiled in the framework of National Account System are called National Accounts Statistics.

International Standard Industrial Classification

The International Standard Industrial Classification of Economic Activities is the international reference classification of productive activities. Its main purpose is to provide a set of economic activity categories that can be utilized for the collection and reporting of statistics according to such activities.

Gross Domestic Product (GDP)

Gross Domestic Product is the monetary value of all final goods and services produced in economic territory of a country during an accounting period. Or, GDP is the sum of gross value added of all residents producer units within the economic borders of a country during a given period of time.

Gross Value Added

Gross value added is the sum of output minus intermediate consumption of a production process.

Intermediate Consumption

Intermediate consumption is the value of goods and services consumed as inputs in the production process.

GDP Per Capita

GDP per capita is the Gross Domestic Product value divide by the total current

year population.

Current Price

Current Price is the monetary value of goods and services at a certain accounting period at the time when the transaction takes place

Constant Price

Constant Price is the monetary value of goods and services at a certain accounting period, based on prices of a base year.

Base Period

The period that provides weights for indexes is described as the base period and other periods or years are being compared to that.

GDP Price Deflator

GDP price deflator is calculated by dividing annual GDP at current price by the corresponding GDP at constant price.

Key Sectors in GDP

1- Agriculture

According to International Standard Industrial Classification, agriculture includes cereals, fruits, livestock, forestry and fishing.

-2Industry

This sector includes mining, manufacturing, energy (electricity, gas and water) and construction.

- 3Services

This sector includes all other branches of economic activities, i.e. transportation and communication, wholesale and retail trade, hotels and restaurants, banking, insurance, real estate, ownership of dwellings, public administration and defense, NGOs, professional, and personal services including domestic services, education, health care, garages, repair, and other services.

GDP Compilation Approaches

GDP can be compiled by three approaches, namely production, income and expenditure.

-1Production Approach

Production approach is the total production output minus costs of input goods or intermediate consumption that is used in the production process.

-2Income Approach

The second approach to estimating the value added of different kinds of eco-

conomic activities includes the following components:

- The compensation of employees or wages and salaries and other benefits
- The operating surplus, or mixed income
- The net indirect taxes

In the case of producers of government services and NGOs, the operating surplus is not applicable.

-3Expenditure Approach

Expenditure approach involves making independent estimates of the final consumption of the private sector, government, change in stocks, gross fixed capital formation, and imports and exports of goods and services.

Total Final Consumption Expenditure

Total final consumption expenditure is the sum of private and government consumption.

Government Consumption

Government consumption includes all current expenditures for purchases of goods and services of all branches of the government.

Private Consumption

Private consumption is the value of all goods and services purchased or received as income in kind by households and non-profit institutions; except purchases of residential houses, including the rents of houses owned.

Capital Formation

Capital formation is that part of current output of the economic activities and imported goods which is not consumed or exported during the accounting period but set aside as addition to Fixed Assets and stock of capital goods.

Fixed Capital Assets

Fixed capital assets are:

- Durable goods that last more than one year
- Used for the purpose of production or generating income
- Cost more than USD\$300
- New construction and major improvements which extend its life period.
- Reclamation and improvement of land and the development and extension of timber tracts, orchards, plantations and similar other agricultural holdings.

Factor Services

Factor services comprise of income of labor and capital, thus covering income paid to non- resident workers and investment income (receipts and payments on direct investment, portfolio investment, and other investment, and receipts on reserve assets).

Non-Factor Services

Comprise of services on account of freight and insurance, passenger services other transportation travel and other goods and services. These include transactions with non-residents by government agencies and their personnel abroad, as well as transactions by private residents with foreign governments and government personnel stationed in Afghanistan.

Gross Domestic Savings

Gross domestic savings are calculated as the difference between GDP and total final consumption expenditure.

Consumer Price Index

The Consumer Price Index describes the movements of the general price level of goods and services purchased by households.

Exchange Rate

Exchange rate is the prices of a foreign currency unit versus local currency by the free market vendors.

Total Domestic Revenue

Total domestic revenue is the sum of tax and non-tax revenue.

Tax Revenue

Tax revenue is the sum of direct and indirect taxes.

Direct Taxes

Direct Taxes are the taxes that are levied on the income of individuals or organizations.

Indirect Taxes

Indirect taxes are those paid by consumers when they buy goods and services.

Import Duties

Import duties consist of customs duties, or other import charge, which are payable on goods of a particular type when they enter the economic territory of a country.

Wage and Salaries

Wage and salaries consists of all payments in cash, but not in kind, to employees in return of services rendered, before deduction of withholding taxes and employees' contributions to social security and pension funds.

Agriculture

Agriculture is the work and activities of agriculture and agricultural use of the land, livestock, and forests as well as fishing.

Agricultural Area

Agricultural area is typically the land used for agriculture, which includes irrigated and rain fed lands.

Irrigated Land

Irrigated land is the type of land irrigated by means of sea, pipes, springs, ditches, or streams.

Rain Fed Land

The land that is that is irrigated through the rain.

Arable Land

Is a land that is practically under cultivation of plants, that is one year or several years old.

Agricultural Land

Agricultural land is the land under cultivation of permanent or temporary crops, pastures, and orchards.

Permanent Pasture

It refers to lands that are located on the slopes of high surfaces in which plants grow naturally and livestock use their grass.

Gardens

A garden is a planned space, usually outdoors, set for planting of plants of many years old and includes fruitful trees and non-fruitful trees, ornamental plants and vineyards.

Forests

A forest is a large area dominated by variety of trees which grow naturally such as pine trees and other stemmed plants and shrubs.

Other Land

It is the land which is not in direct use of agriculture and is being used for other purposes. It includes lands covered by rivers, mountains, roads and the industrial areas etc.

Total Energy Use

The use of the renewable energy generator like electricity, oil and gas, fuel, wood and traditional fuels.

Industry

Industry means manufacturing, profession and art. In general, manufacturing industry means changing the shape or composition of materials.

Industrial Terms Used in the Statistical Yearbook

In the statistical yearbook, the fourth result of the international standard classification of the field of activity has been used.

Foreign Trade

Foreign trade refers to transfer of goods and services (imports and exports) between world countries.

Export

Is the flow of goods and services from inside the country to another country. In this yearbook, export means the flow of goods and/or services outside of the country's custom territory.

Import

Is the flow of goods and services entering the country from another country. Here, import means the flow of goods and/or services entering the country's custom territory.

Trade Balance

Trade balance is the difference between the value of exports, which includes cost, insurance and freight transport, and imports cost, insurance and freight transport.

Foreign Aid

Foreign aid includes grants and long-term loans provided by foreign governments and international organizations for use in civilian areas.

Aid

Mainly include payments that the recipient is not obliged to repay.

Loan

Includes payments, which the recipient is required to pay back.

Bilateral Aid

Is the aid in which the implementation responsibility lies on national institutions and takes place from country to country based on agreements.

Multilateral Aid

Multilateral aid is one whose executive responsibility is on international institutions. The difference between bilateral and multilateral aid is that bilateral aid is exchanged and/ or transferred between two governments, whereas the multilateral aid is exchanged and/ or transferred through international institutions among governments.

The Usage and Explanation of Signs and Symbols in Statistical Publications

NO.	Sign/ Symbol	Explanation
1	,	Decimal in Dari and Pashto Languages
2	.	Decimal in English Language
3	0	The value is zero.
4	0,0	The data is negligible.
5	...	The data was not available till publishing
6	-	The data is not collected.
7	*	The data is estimated.
8	XX	Not Applicable
9	**	The data is not final.
10		The data is not presented due to confidentiality.
